DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species A in the paper filed 8/21/2003 is acknowledged. The traversal is on the ground(s) that a search of the prior art for claims 2-6 would result in a search of prior art with respect to claims 7 and 8; and that a divisional would result in the same search being repeated. This is not found persuasive because applicant has not submitted or identified evidence showing the species to be obvious variants or clearly admitted on the record that this is the case.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 7 and 8 drawn to an invention nonelected with traverse in the paper filed 8/21/2003. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1-6 continue to be rejected under 35 U.S.C. 102(b) as being anticipated by Matsugi et al. (5,667,758) as presented in paragraph 5 of the previous office action.

Response to Arguments

Specification

The objection to the specification has been withdrawn due to applicant's amendments.

35 USC 102

Applicant argues that the heat pipe heat transfer device of Matsugi, as asserted by the examiner, is not a heat pipe since it lacks a porous medium affixed thereto. Applicant points to applicant's own specification at page 3 for the description of the heat pipe.

In response to applicant's argument that the reference fails to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., porous medium affixed to a heat transfer surface) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

The term "heat pipe heat transfer device" is not defined in the specification so as to limit the claims to the specific device of U.S. Patent No. 2, 350,348. No evidence has been submitted to demonstrate that a "heat pipe heat transfer device" is restricted to the description of the specification or of U.S. Patent No. 2,350,348. Claims are construed broadly and therefore the rejection in view of Matsugi et al. is maintained as the pipe of Matsugi et al. is in fact a heat transfer device (col. 5, lines 14-16) of a pipe form (col. 4, lines 58-65).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

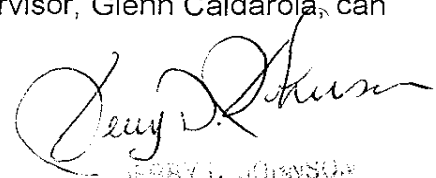

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
